

Owners

Urban Sun Investments, Inc. collaborates with owners of investment and commercial real estate to unlock value and maximize their triple bottom line. In addition to meeting our partners' immediate needs, we take a whole systems approach to maximize value throughout the entire life cycle of their real estate.

We provide solutions to real estate owners with the following questions:

- Should I hold, sell, refinance, reposition, or redevelop?
- How can I maximize the economic benefits of my real estate while being environmentally and socially responsible?
- What should I develop?
- How can I add value to and minimize risk in my real estate portfolio?

We encourage all of our partners to build sustainably. There are many benefits to building Green including reduced operating costs, product differentiation, streamlined approvals, and the satisfaction of conserving the environment and improving their community well into the future.
